

COMPLETELY UNAFFECTED
BY VARIABLE VISCOSITY

New **MICRO C**-series pumps
WITH SEAL-LESS TECHNOLOGY DESIGN

The new Micro C eccentric disc pump guarantees regular, consistent flow, whatever the viscosity of the pumped product. The micro C line also offers:

- total respect of the pumped product, thanks to low shear
- no leaks whatsoever, through seal-less design
- outstanding performance over time, with automatic wear adjustment
- high self-priming capacity
- strong compression power to empty the intake and discharge lines.
